HONGKONG, JANUARY 28th, 1882.

LEGISLATION in Hongkong has come apparently to a complete standstill, the reputed activity of its Governor notwithstanding. The last meeting of the Legislative Council at which any save formal, business was some local demand. transacted was held on the 29th August last some five months ago. It will be recollected that at the meeting of Council of the 23rd August the Hon. F. Bulkeley Johnson, in the course of a speech on the work of the unofficial members, suggested among other hings that the Council meetings should be held at fixed periods, mentioning at the. same time the first Monday in each month as convenient dates. His Excellency the Go-VERNOE, in reply, said he was much obliged to his bon, friend for the suggestions be had made and added that the one as to having fixed times for the Council meetings was " well till they confessed that they were the murderers, "deserving the consideration of the Govern-"ment and be would not fail to give it his the murder. Consequently the relatives of those "best attention." We can only presume that the suggestion has required very extended consideration indeed, for His Excellency has certainly not adopted it yet, nor has there been the remotest appearance of any intention on his part to do so. ministrator has ever adhered more rigidly to the old practice of merely summoning the road. He has left the Civil Hospital, and is now Council when it was absolutely unavoidable fire, Middle, who is also a fireman, was attending or when he desired to give some lengthy ex- to the discharge of a jet of water from a hoseupon HENNESSY. It may perhaps be argued by legislative purposes and little legislation is taken to the Civil Hospital, where he was found really required in this small Colony, frequent should be remembered, however, that the Government here undertake the duties that ordinarily devolve on a municipality, and that sented of the recent floods near An-fu Haien in had been reduced by one-half. It appears that the officer in question able to afford the Government valuable was a Frenchman and his wife a Japanese, and assistance. The prolonged delay in summoning the Council is very generally ascribed to His Excellency's disinclination to meet some anticipated inquiries with regard to his late Private Secretary. If ing the result of the inquiry which will be made such inquiries are to be made the sooner THE CHRONICLE has been considerably they are disposed of the better. We incline to the opinion, however, that there will not be another meeting before His Excellency's departure. The moetings are hold entirely at the the offert that, such has been the output of the pleasure of the Governor, and as at the present moment there is no immediately pressing awaiting the consideration of the Legislature, the non-calling of a meeting may easily be defended on technical grounds. The Tram-

measure (such for instance, as the Estimates) menou sinking shafts in the adjacent iron-mines. way Bill, it is true, is standing over for its third reading, but on this subject His Excollency said at the last meeting of Council he was in communication with Lord Kun-BERLEY, and possibly the views of the Home Government have not yet been finally ascertained. Quite apart from technical considerations, however, it is eminently desirable that a meeting of the Council should he held. The present might not be a favour-

able time for indulging in the self-laudation The permission for the free cultivation of tobacco in the Philippines is evidently destined of which Sir John Pope Hennessy is so fond, but this would hardly be a sufficient excuse for not-holding a meeting should it appear advisable for other reasons. We learn from Chinese sources that large numbers of hawkers and workmen belonging to the lower classes have lately come down here from Canton to emigrate to the Malayan States, having been tempted by the promises of high wages held out by Chinese agents in this Colony. Our Chinese informant appears to think that the men are misled and have no liberty of movement when they reach the Straits. In this respect however, he is mistaken, insemuch as emigrants arriving at Singapore can always appeal to the Protector of Alhinese for advice and assistance if any attempt be made to impose upon them.

Three years ago (says a Shaughai contemporary) a man was murdered near Nauking, and the authorities after torturing a priest and a butcher out them to death. A thief was afterwards arrested and he confessed that he had committed who fell victims to the mistake of the mandaring. rought the matter to the notice of the Emperor, and now the mandarin who sentenced the two men to death has been ordered to Peking to explain his conduct. Whether death or benishment is to be his sentence remains to be seen.

OPIUM PRODUCTION.

Most of the agitators against the Indian opinm trade appear to fancy that India is the only conntry that produces the drug, and China the only one that consumes it. But, to mention no other places, its manufacture has for many years been progressing fast in Egypt, Algeria, Anatolia and in Persia, where it is said to have been in troduced from Asia Minor by the Dutch colony, many of whom had important establishments in were the first to foster its production in the time when the drug was only used for smoking that the noise made by the wires in the wind is and amongst Asiatios; its employment in medioine was formerly slight; but the modern preparations of morphia and its derivatives have much extended its use in the European pharmacopeim. Out of 640 chests shipped for England or America within the past two months, Liverpool took nearly two-thirds, London one-fourth, and Ambrica an eighth -chiefly it is asserted, for the Chinese of the Western States. The moment the incision is made the white juice begins to escape all round, and is left to dry and thicken in the heat of the day for six or eight hours, when it becomes a yellow resinous looking substance, which later turns to a darker hue. It is then scraped off with the knife, and squeesed into lumps as the gatherer proceeds. These lumps, which are each generally less than two pounds in weight, are rolled up it poppy-leaves, and left for some days further to dry in the sun. While still soft, they are packed into small baskets lined with cotton cloth, the

balls being powdered with sorrel-seed to prevent them from sticking together. The average yield of an acre of ground is over 23 lbs. of opium, which, at the late price of the best quality at Constantinople (220 gold plastres the oke) gives about sixteen guineas the acro; and there is besides the poppy-seed, which now which is often mixed with olive oil when the orop of olives rans short. Many boxes of letters are received at the Post Office not sealed that is to sav. the how is fastened with sealing war, but there is no impression of a sect. The eitention of hoxholders is called to the madensity of carefully sealing such hoxes with some recognisable seal and of sending a chitbook or receipt with them. The omission of the latter precention leaves a doubt as to whe that the contents of the box ever reached the Post Office: the emission of the former, as to whather nart of them might not have been abstracted for the sake of the Postage Staning.

## A COMMON STORY

I y old love whom I loved not, In this your friendly hand? Your very voice, with a tremble in it None olse could understand. My old love whom I loved not!"

After so pingy years, Parting in ailence and in pain, -To meet with smiles, not tears. My old love whom I loved not,

Do you regret-not I!-That all died out which best were dead, All fived which could not dio? Till at last we meet here, And clasp long ompty hands, Keeping our eilent secret safe,

O kind leve, whom I love not! O faithful, firm, and true! Did one friend linger near my grave, I think it would be you.

Which no one understands.

Could I wish one heart to hold me A little unforgot, I think 'twould be that heart of yours,

My love-whom I loved not! MRS. MULOCK-CRAIG, in Harper's Weakly.

THE POLKA. The death is announced at Prague of musical professor, Franz Hilmar, at the age of 79 years. According to the Academy, Professor Hilmer has the credit of being the inventor of the polks. About 40 years ago he composed the first polks that ever appeared in print, both the music and the step being taken from a popular Bohemian country dance. In Czoch the word "polks" means "half;" the analogy of meaning is obvious. The first polks over written was the "Esmeralda Polka."
